

IS THE ECONOMY PUTTING YOUR BUSINESS IN THE HOT SEAT?

YOU COULD IMPROVE YOUR BUSINESS WITH OUR 1.5 HOUR
FREE ONE-ON-ONE BUSINESS BUILDING OVERVIEW

Our business overview does three things:

1. It puts a magnifying glass on what is and isn't working in your business.
2. It helps you to identify the areas of your business that need change.
3. It provides you with ideas, systems and strategies for building your business and making it more recession proof.

How does it work?

During your 1.5 hour-session, I will go through and ask a whole lot of questions regarding your business so we can work out where you're at, where you want to go with your business and what it will take to get you moving in the right direction.

Fundamentally, it's a fact-finding mission to determine what your business needs to get it back on track. Once we've identified your needs, I'll share some ideas regarding systems, strategies and ways of building your business that you may have never considered before.

We will cover topics such as:

- 1) How to maximize your existing database for increased revenue potential.
- 2) How networking can help you set up joint ventures and strategic alliances with people that will grow your business for you.
- 3) How to systemize your business through implementing policies and procedures so you can choose when and how often you work in your business....and many, many more topics.

We normally charge \$199.00 for a Business Overview, however, since we are about to enter our 15th year in business we are celebrating and want you to celebrate with us.
